PROJECTS

- **Amazon Clone**
An Amazon clone website using the magic of HTML and CSS. With the div tag, crafted separate sections for the navigation bar, hero section, and footer. Also added animations to make the site more dynamic, and have used the official Amazon logos to give it an authentic look.
- **Survey Form**
Using HTML's form tag and div tags, molded a survey form that is both functional and aesthetically pleasing. CSS flexbox provides the finishing touches, lending your creation a sleek and modern look.
- **Parallax Website**
Developed a parallax website using HTML and CSS, showcasing the power of CSS flexbox to create a visually stunning and dynamic user experience. The website features multiple layers of content that move at different speeds when the user scrolls, creating a three-dimensional effect.
